**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Hanscom on 7-28-2009.

The application has been amended as follows:

Claim 43 is allowable. Claims 44-54 and 58-62, previously withdrawn from consideration as a result of a restriction requirement, contain all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions 1-11, as set forth in the Office action mailed on 6-5-2008, is hereby withdrawn** and claims 44-54 and 58-62 have been hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

In claim 57, last line, the word “said” has been changed to -- a --.

In claim 58, last line, the word “product” has been changed to -- material --.

The above changes to claims 57 and 58 have been made to correct minor oversights by the applicant and to place the application in condition for allowance.

The following is an examiner’s statement of reasons for allowance:

Regarding claim 43, no prior art has been found to teach the overall combination of steps in a method for compensating for at least one of transverse elongation and a longitudinal elongation of a web of material to be printed as claimed including particularly the three tier approach of (1) estimating an amount of at least one of an anticipated transverse elongation and of an anticipated longitudinal elongation which is to be expected to occur in the material to be printed and compensating for the anticipated estimated transverse elongation of the web of material by applying a first print image at a first selected print image location on a first printing form and applying a second print image at a second selected print image location on a second printing form prior to mounting the first and second printing forms on the respective first and second form cylinders, (2) determining an amount of an actual transverse elongation in the web of material occurring as a result of the printing of the web of material by the first printing group, and using the image regulator and deforming the web of material for compensating for said determined actual amount of said transverse elongation in the web of material when said actual

Art Unit: 2854

transverse elongation is greater than said estimated transverse elongation, (3) providing a controllable printing form shifting assembly in each of the first and second form cylinders, and displacing at least one of the first and second printing form on the first and second form cylinders using the controllable printing form shifting assembly and changing the print image location on at least one of the first and second form cylinder in response to an additional actual transverse elongation of the material to be printed when the actual transverse elongation is greater than an amount which can be compensated for by using the image regulator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ren L. Yan whose telephone number is 571-272-2173. The examiner can normally be reached on 8:30am-5:00pm.
